

p.2-4

Instructions for activating the new Blue KEY authentication solution integrated into the BluOr Bank application

p.5-14

A quick guide to the features of the new Blue KEY

For your convenience, we recommend using an additional device for activation

Activating the new Blue KEY authentication solution integrated into the BluOr Bank application

1

An email with further steps for Blue KEY activation will be sent to the email address you specified

1.1 Click on the "Blue KEY Activation" button to proceed to the next step

BLUE KEY ACTIVATION

The activation page is valid for 48 hours till 27.01.2022 11:09:36.

2

Enter your login, after which an SMS with an activation code will be sent to the phone number you specified

2.1 Sign in using the code you received via SMS to proceed to the next step

3

After logging in, a page with the QR code required to activate Blue KEY will be available on the Internet Bank page

The page will close automatically after activating Blue KEY on your device

4

Open the BluOr Bank app and click on the "New Blue KEY" button

4.1 Scan the QR code from the screen with your device (3)

5

To complete activation, create a password that will be used to log in to the application and sign off on transactions

The password must be at least 6 characters long

6

After successful activation of Blue KEY, a list of new functions will be available in the menu

The new solution can be used for Internet Bank activities, for example, to log in or sign off on a payment

!

Save and do not forget your Blue KEY password

Sign your transactions with the Blue KEY solution integrated into the BluOr Bank application

1 When you log into the Internet Bank or sign a transaction, a push notification is sent to your phone

2 Click on the Push notification, enter the Blue KEY password and confirm the login to the Internet Bank

! If Push notifications are disabled or not received for another reason, you can proceed to the login confirmation directly from the app

1.2 Sign in to the application, open the Blue KEY menu and go to "Pending transactions"

3

Confirm the login by clicking "Approve", after which you will be logged into the Internet Bank

3.1 Use the new solution for both logging in and signing your payments

3.2 You have the option to both confirm and cancel a transaction

Use the new authentication solution when paying for online purchases **by card**

1

After confirming the transaction, an authentication code will be generated on your device

2

Enter the generated password from the screen of your device, after which the payment will be successfully completed

By selecting FingerPrint authentication method, it is also possible to sign transactions without entering a Blue KEY password

FingerPrint settings are only available if PIN is enabled

3.1 After enabling FingerPrint, a biometrics icon will appear in the PIN entry window

Offline transactions

1

Sign into the app, open the Blue KEY menu and go to "Offline transaction"

2

Sign into the app, open the Blue KEY menu and go to "Offline transaction"

This function allows you to receive a code to confirm the transaction in the Offline mode

Change Blue KEY password

- 1 Go to the Blue KEY function menu and click on "Change password"

- 2

Enter your current and new passwords.
You cannot use the old password as the new one

The password must be at least 6 characters long

Save and do not forget your Blue KEY password

Migrate license

1 Go to the Blue KEY function menu and click on "Migrate licence"

2 Login with the Blue KEY password and create a **one-time** password for transferring the license

The password must be at least 8 characters long and contain at least one uppercase and lowercase letter (of the Latin alphabet) and a number

3

After you have created a one-time password and clicked "Start", a QR code is generated

4

Click on the "Activate Blue KEY" button on the second device and scan the QR code from the screen of the first device (3)

5

After scanning the QR code, a window appears in which you need to enter the **one-time** password created earlier (2)

6

Create the password to activate Blue KEY on the new device, after which the license transfer will be completed

The password must be at least 6 characters long

!

Save and do not forget your Blue KEY password
